

E82

E82 ELLIPTICAL SPECS AT A GLANCE

PERFORMANCE SPECIFICATIONS

Fingertip Controls for Resistance and Stride Length Adjustment	Yes
Dual Action, Total Body Motion	Yes
afit ™ TECHNOLOGY	Yes. Patented electronic stride adjust (17" - 26")
Multi-Radius™ Stride Arms	Yes
Electronics Package	Oversize dot matrix. Programs include Custom, Hill, Random, INTV 1, INTV 2, Plateau, Wt Loss HRC, Cardio HRC, Quick Start, and Manual. 14 resistance levels. Feedback includes Time, Calories, Resistance Level, Calories Per Hour, Strides, Strides Per Minute, Stride Length, and Watts.
POLAR Heart Rate Control	Yes
Personal CardioAdvisor™	Yes
Contact Heart Rate	Yes

QUALITY AND MANUFACTURING SPECIFICATIONS

Welded Steel Frame	Yes
Ball Bearing Joints	Yes
Electrostatically Applied Powder Coat Finish	Yes
Eddy-Current Resistance	Yes
Poly-v Belt Drive	Yes
Certifications	TÜV ISO 9001/9002, ASQC 9001/9002, ETL-C, CE

GENERAL SPECIFICATIONS

Maximum User Weight	330 lbs., 150 kgs
Unit Dimensions	L: 77", W: 22", H: 72"
Unit Weight	172 lbs., 78 kgs
Warranty	Institutional use, lifetime frame, 2 years parts, 1 year labor (6 hours per day max. usage)

SportsArt commercial products embody a commitment to world class manufacturing standards, precision engineering, and innovative design. In our elliptical products this innovation appears most notably with the adjustable stride length. This breakthrough feature has succeeded in re-inventing an entire product category.

Adjustable stride length keeps all users happy

TECHNICAL HIGHLIGHTS

SportsArt's unique approach to design has led to **fit™ TECHNOLOGY**. This philosophy gives users the ability to customize the product to fit individual sizes, shapes, and needs. On the E82 elliptical this means patented adjustable stride length (range 17" to 26").

The state-of-the-art display features another SportsArt innovation – Personal CardioAdvisor. A user simply enters their age and the system automatically displays both their weight loss and cardio training heart rate targets. These remain displayed during the entire workout. Users wearing a chest strap will see their real time HR displayed at all times and be able to compare it to their training targets. Contact heart rate grips allow those not wearing a chest strap to monitor their HR at any time.

SERVICE AWARD

SPORTSART IS ONE OF THE PIONEERS

in the elliptical product category. Our latest effort, the E82, contains all of the refinement and innovation you would expect from an industry leader.

Smooth is an overused word yet it is hard to find another adjective that so aptly describes the E82. From the precision machined (and virtually silent) drive system to the ball bearing centered glide wheels to the actual no-impact motion, this machine embodies smooth.

Premium components, a tough, welded steel frame (with lifetime warranty), advanced electronics, and of course, patented adjustable stride length will deliver years of enjoyable performance for all users.

COMMERCIAL ELLIPTICAL Institutional Series

“SportsArt ellipticals are the best ellipticals I have found. The adjustable stride is a “must have” feature.”

Tom Webster, Owner
Webster's Fitness
Pittsburgh, PA

Convenient fingertip toggle switches electronically adjust both resistance level and stride length.
